

StyroPak®

CONVENIENT &
LIGHTWEIGHT EPS
PACKAGING

ANOTHER ENGINEERED SOLUTION FROM:

FOAMEX®
EST-1982

NO OTHER PACKAGING MATERIAL DELIVERS THE UNIQUE COMBINATION OF PERFORMANCE, ECONOMIC AND ENVIRONMENTAL BENEFITS

Highly versatile and adaptable, StyroPak EPS boxes from Foamex can be utilised in a number of ways – from packaging fresh fish and produce, to storing temperature sensitive goods that need to be transported around the world, and even as seed trays to assist with the growth of plants.

The introduction of EPS for packaging of goods has seen the cost of packaging and transportation significantly reduced. This is because the energy required to manufacture and transport EPS is much lower than conventional packaging materials such as timber, straw, cork, and cardboard.

StyroPak EPS packaging boxes are manufactured from our industry leading Styroboard EPS expanded polystyrene, made in Australia for Australian conditions.

StyroPak EPS boxes are:

- Easy to handle and stack
- Resistant to bacteria growth and moisture
- Airline approved
- Outstanding shock absorbency
- Valued for high insulation properties
- More cost efficient to transport and manufacture
- Environmentally sound and recyclable

STYROPAK: FEATURES & BENEFITS

The Foamex range of Styroboard EPS products are relied upon Australia wide for insulation and decorative purposes across a wide range of industries. Durable and long lasting, Styroboard EPS products are light in weight for easy installation, offer outstanding acoustic benefits

Durability

The exceptional durability of EPS makes it an effective and reliable protective packaging for all sorts of fresh food and other goods, meaning products inside the foam boxes stay protected during shipping.

Lightweight

EPS is a lightweight packaging material which does not significantly add to the weight of the total product (in fact, it's made up of 98% air). This means that fuel costs are reduced, and fuel emissions are lower than alternative packaging.

Thermal Insulation

The thermal insulation properties of StyroPak EPS boxes help keep food fresh and chilled through the distribution chain, providing up to 48 hours of chill time during transport.

Shock Absorbency

StyroPak EPS packaging has outstanding shock absorbency and compression, providing excellent protection for your products during transportation.

Versatility

StyroPak EPS packaging can be moulded into any shape or form to meet your products protection and insulation needs.

Fully Recyclable

StyroPak EPS boxes are fully recyclable. Foamex processes old EPS boxes through our recycling plant and these get broken down and manufactured into other sustainable products.

STYROPAK PRODUCT RANGE

Foamex carries a large range of foam packaging products. Whether you need to protect valuable items during shipping, maintain a required temperature or humidity level, or simply ensure that products are kept in their original condition, we will have a StyroPak solution to suit your business.

Insulated Ice/Cooler Boxes

StyroPak insulated cooler boxes provide up to 48 hours of chill time during transport when used in conjunction with cold bricks or ice packs. Ideal for ice and other forms of produce, our cooler boxes come in range of sizes from small 4 litre coolers to 54 litre coolers.

Produce Boxes

When it comes to the best food packaging products, StyroPak meets all hygiene requirements. Even in damp conditions, the material is moisture resistant and there is no loss of strength. With a range of sizes our produce boxes are ideal for items requiring cold storage.

Wine Boxes

StyroPak's range of wine boxes provide excellent storage and travel protection for shipping fragile items such as wine bottles. Available in single, double or triple packs, the protective foam base will fit standard wine or champagne bottles.

Seafood Boxes

Delivering seafood at its freshest is of the utmost importance to suppliers. Ideal for cold storage requirements, StyroPak offers a range of speciality seafood transport boxes custom designed to transport even the most delicate of seafood items.

LEADING THE WAY IN ALTERNATE BUILDING & INSULATION PRODUCTS

Foamex is one of Australia's largest manufacturers of high quality building and insulation products, supplying a range of expanded polystyrene, extruded polystyrene, and specialty foam products for various building, construction, civil engineering, packaging and retail applications.

A nationally recognised leader in sustainable insulation solutions, Foamex is proudly Australian owned and operated. All our polystyrene products are manufactured in house to strict Australian quality control standards.

StyroPak EPS boxes are only available for order through our VIC, SA & QLD state offices, however, we do deliver Australia wide.
